Art Unit: 3632

This is an office action for serial number 10/722,633, entitled Suspension Device For thermoplastic containers, filed on 11/16/03. This office action is a supplemental office action which will restart the time for response. In previous office action mailed on December 14, 2005 the examiner inadvertently omitted claims 63-65 which have been included in this office action.

Election/Restrictions

Applicant's election without traverse of Species IV drawn to figures 13-16 in the reply filed on October 14, 2004 is acknowledged.

Claims 1-40 and 73-83 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 14, 2004.

Specification

The disclosure is objected to because of the following informalities: page 10, line 1, 100b and 106 are not shown in figures 15 or 16.

Appropriate correction is required.

Art Unit: 3632

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 41-47, 49, 50, 52-58, 60, 61, 63-66, and 68-71 are rejected under 35 U.S.C. 102(b) as anticipated by or Burger 2,633,323, in the alternative, under 35 U.S.C. 103(a) as obvious over Iorio 3,527,345. Burger discloses a combination of a suspension device having a main member (51), support members (53), wall members (55), interference members (56), and mounting holes (52), a container (25) with a rim (17). Burger teaches that it is known to provide wall members (55) of a height to receive lids/closures for the container (column 3, lines 64ff). Iorio teaches that it is known to store containers (20) having lids (24) and a suspension device (10). It would have been obvious to provide a lid as taught by Iorio as motivated by Burger for the purpose of sealing the container during storage to prevent the collection of dust.

Art Unit: 3632

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 48, 59, and 67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burger in view of Porteous 4,844,308. Burger discloses all of the limitations of the claimed invention except for the tab. Porteous teaches that it is known to have a tab on a lid (76). It would have been obvious to one having ordinary skill in the art to have modified Burger to have included the tab as taught by Porteous to the container lid/cap/closure of Burger for the purpose of providing a pull tab for the pulling the cap/lid/closure off of the container or for pulling the lid out of the suspension device within in use.

Claims 51, 62, and 72 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burger in view of Semon et al. (Semon) 6,056,378. Semon teaches double sided adhesive tape (18). It would have been obvious to one having ordinary skill in the art to have modified Burger to have attached the

Art Unit: 3632

suspension device using double sided adhesive tape as taught by Semon for the purpose of providing a better means of attachment.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art discloses conventional suspension devices.
